

# The Lorax and Truax Debate

## The Lorax

1. What type of harvest was done to the Truffula trees?
2. What did the Lorax warn would happen if you cut down the trees?
3. What did the Lorax promise if you were to plant the Truffula seeds?
4. What was the moral of The Lorax?
5. What could one do to harvest the Truffula trees to make all of the tree products but ensure there would be trees for the future? Give your advice to the narrator to sustain the Truffula forest while still using the trees.

## The Truax

1. Why did Guardbark want people to not disturb the trees?
2. Why did Truax think that it was okay to harvest some of the trees?
3. What did Truax and his friends do to make sure that there are plenty of trees for the future (to sustain the forest)?
4. Truax and his friends use sustainable practices to make sure there are trees for the future, how does this make you feel?
5. How does The Truax story differ from The Lorax story? Which one do you believe is most realistic or comparable to how forests are managed in the U.S.?
